

Candidate Information Pack

Hardware/Embedded Engineer
Executive Level 1

Position details

Title	Hardware/Embedded Engineer
Classification	Executive Level 1
Location	Canberra
Salary Range	\$150,072 – \$175,338
Contact	Recruitment Phone: (02) 6261 1849
Closing Date and Time	Please refer to date on website

About ASIS

The Australian Secret Intelligence Service (ASIS) is Australia's overseas intelligence collection agency. We are Australia's experts at collecting highly sensitive information – secret intelligence – from sources overseas to keep Australia and our region safe and prosperous.

Our work spans continents and cultures. As a tech-powered and data-driven organisation, we use covert techniques and cutting-edge technology to put us in the right rooms, next to the right people, with the right access to the intelligence we need. We are tasked to collect intelligence – it might be political, military or economic information – deliberately withheld from the Australian Government that might present threats to or opportunities for Australia.

From graduates to career changers, we come from every corner of the country and all walks of life, with backgrounds from all around the world.

Regardless of our ethnicity, experiences and education, we're bound by a shared commitment to something bigger: building a better future for those who come after us. We seek to reflect the community we serve, and welcome applications from Aboriginal and Torres Strait Islander peoples, women, people with a disability, neurodiverse, people from culturally and linguistically diverse backgrounds and those who identify as LGBTQIA+.

It's a mission owned by everyone, with opportunities for all.

The role

ASIS develops cutting edge technical systems for use in diverse environments. The capability development team is looking to grow their next generation of hardware/embedded engineers in a rewarding and supporting environment. As a core part of a team developing end to end solutions to a variety of problems, ASIS needs people who contribute through all phases of the operational technology life cycle; from hardware design and low-level software/firmware systems through to manufacture.

Hardware/embedded engineers also provide specialised advice to other groups on relevant and emerging technologies. Problem solving skills and a familiarity with industry best practise tools, techniques and technologies for current and emerging hardware systems are important for the role.

This is a unique opportunity to lead meaningful projects (and potentially small engineering teams) that combine the best of technology with exciting challenges. This role will provide you with exposure to a large number of technologies and tools, and great opportunity for growth. Opportunities for engagement with partners across Australia and the world, and ongoing professional development will enable currency and continuous growth in the role.

Role responsibilities

- Lead systems level design by analysing the impacts of hardware and firmware on system design and performance, applying best practice engineering processes
- Prototype and demonstrate hardware and firmware designs
- Lead design, implementation and testing of embedded systems as part of a multidisciplinary engineering team
- Engage with customers and suppliers to understand the requirements and distil these to engineering activities
- Evaluate and understand how relevant emerging technologies can advance our outcomes and provide subject matter expertise to other areas of ASIS

Core skills

We encourage applicants with the following skills and attributes to apply:

- Experience leading multidisciplinary teams
- Experience working on electronic components and systems, firmware and hardware/software interfaces
- PCB layout (Altium preferred), PCB assembly and bring up of hardware systems
- Familiarity with microcontroller firmware processes, tools and architectures

-
- Understanding of low power design techniques including battery and firmware considerations
 - Understanding of RF system design and relevance to wireless communications technologies
 - Familiarity with the typical buses and interfaces used in embedded systems, including FPGA based interconnects
 - Experience with wireless communications techniques and communications systems analysis, including antenna design and characterisation
 - Experience with ARM Cortex-M firmware in C
 - Knowledge of Real Time Operating Systems for low power systems
 - Be able to support analysis and design trade-offs using tools such as MATLAB or Python
 - Hardware and low-level software reverse engineering techniques
 - Project management, risk analysis, contract administration, structured testing and/or system design skills and experience will be highly regarded
 - Understanding of code management and version control systems such as Git

Education and qualification requirements

The following education, qualifications and/or experience will be highly regarded:

- Bachelor or Post Graduate degree in: engineering (electronics, software, telecommunications), applied physics, or equivalent practical experience (including ongoing studies) in closely related fields
- Minimum three years of relevant professional experience

Benefits of working at ASIS

ASIS employees enjoy access to generous workplace terms and conditions. Benefits include but are not limited to:

- Competitive salary plus 15.4% superannuation
- A variety of leave options including 22 days paid annual leave per year
- Paid leave between Christmas and New Year
- Domestic Relocation assistance for new staff to Canberra
- Health and wellbeing initiatives
- Salary packaging arrangements
- Learning and development opportunities including access to study assistance
- A variety of support services including but not limited to Employee Assistance Program (EAP) and a Staff and Family Support Office.

While ASIS officers are not able to work from home due to the classified nature of our work, staff have access to a range of flexible working arrangements. These include part time hours, condensed hours and/or flexible start/finish times to support other responsibilities.

ASIS conditions of service are similar to those applying for the Australian Public Service, for a full list of benefits and conditions see asis.gov.au

Eligibility

To be eligible for a role you must:

- Be an Australian citizen
- Be assessed as suitable to hold and maintain a TOP SECRET-Privileged Access security clearance
- For more information on eligibility please see the Protective Security Policy Framework which is publicly accessible at protectivesecurity.gov.au, section 12 provides information on Eligibility and suitability

How to apply

Click on “Apply Now” on our website on the role/s that you are applying for. You will be required to submit the following:

- 800-word pitch outlining your skills and experience for the role
- A current CV, no more than 2 pages in length, outlining your employment history, academic qualifications and relevant training that you may have undertaken
- Details of two referees, which must include a current supervisor

Applicants are encouraged to consider the Integrated Leadership System (ILS) capabilities when preparing their application. For more information on the ILS, and tips for applying for jobs in Australian Public Service, please visit the APSC website found at www.apsc.gov.au.

All applications for employment with ASIS are handled in the strictest confidence. It is essential you maintain a similar level of confidentiality and that you do not discuss your application with anyone.

Important:

If you are currently living overseas and wish to apply for a role with ASIS, please note that we cannot contact you until you return to Australia. Every part of the recruitment process, including contacting you, must be done while you are in Australia.

If you have no plans to return to Australia in the foreseeable future, we recommend you wait until you return before submitting an application.

Use of AI in recruitment process

We recognise some applicants may use AI technologies to draft applications or prepare for interviews. If you wish to use AI, we recommend doing this only for initial drafts and ensure that your application is personalised and accurately reflects your skills, experiences and capabilities.

Additionally, be aware of the privacy policies of any AI tools you use. Be mindful of the information you are entering into AI tools (personal details, work history, etc) and how using it may link you to potential ASIS employment, noting that you are expected to maintain confidentiality with your application.

If you are invited to attend an interview, the use of AI tools and recording devices during the interview is strictly prohibited. Should AI tools or recording services be detected, your application, and any future applications may not be progressed.

Reasonable adjustments

ASIS is committed to fostering a diverse and inclusive environment for candidates to participate in all stages of the selection process. Please let us know if you require any additional assistance or reasonable adjustments during any stage of the recruitment process and we will work with you to manage this throughout. If you are successful in gaining employment, reasonable adjustments can also be made available to you in performing your role.

Recruitment process – what happens next

We thank all applicants for their interest in a role with ASIS. Please be advised that our selection process is rigorous and extensive and that we do not provide feedback to unsuccessful applicants. **If you progress from application, you will receive an SMS requesting you to complete online testing – please ensure that you complete this testing or your application will not progress further.**

All selection process decisions are merit based and candidates must be prepared to undergo various selection stages throughout the process.

A merit pool will be established for candidates who are suitable for this round and will remain valid for 18 months.
